Portfolio | LinkedIn | GitHub

PROFILE

Computer Science graduate with a data analysis internship at FIPE, working with source integration, data validation, automation and reporting. Personal projects combine Python, SQL, APIs and reproducible analytics. Seeking junior data analyst and business intelligence opportunities.

TECHNICAL SKILLS

Analytics & BI: SQL, Python (Pandas), R, Power BI, DAX, Excel and VBA

Data & development: PostgreSQL, SQL Server, REST APIs, FastAPI and data quality checks

Project tooling: Git, Docker, Pytest, GitHub Actions; React, Redis and Celery in personal projects

PROFESSIONAL EXPERIENCE

FIPE - Fundação Instituto de Pesquisas Econômicas

Data Analysis Intern | June 2024 - December 2025

• Automated data preparation and analysis routines using Python, R and Excel/VBA.

• Used SQL and integrated multiple sources to organize, consolidate and validate analytical inputs.

• Checked data consistency and supported indicators, reports and Power BI dashboards.

SELECTED PERSONAL PROJECTS

Brazil Income Analysis

Reproducible Python pipeline using IBGE SIDRA data, with validation across 27 federal units, an HTML dashboard and an executive summary. Separates official snapshots from synthetic learning examples.

DataFlow

Personal reference platform for data quality and traceable transformations using FastAPI, React, PostgreSQL, Celery and Redis. Includes explicit revision history, tests and documented operating limits.

Technical writing

English tutorials on CSV validation, data revisions and SDK evaluation, with reproducible examples and stated limitations.

EDUCATION & LANGUAGES

B.Sc. in Computer Science - Universidade Paulista (UNIP) | Completed in 2026

Portuguese: native | English: advanced
