Maurício Ryo Toita Taguchi

Data Analyst | SQL, Python & Power BI

São Paulo, Brazil | Remote or hybrid opportunities

mauricioryotoitataguchi@gmail.com | Portfolio | Case studies | LinkedIn | GitHub

PROFILE

Computer Science graduate with a data analysis internship at FIPE, working with economic and collective bargaining data, SQL, Python/R automation and Power BI reporting. Seeking a role in data analytics or business intelligence to develop reliable metrics and support business decisions.

TECHNICAL SKILLS

Data & BI: SQL, Power BI, DAX, advanced Excel, data modeling, ETL/ELT and data quality

Programming: Python (Pandas, NumPy), R, VBA, FastAPI and REST APIs

Databases & tools: PostgreSQL, SQL Server, MySQL, Azure SQL Database, Git, Docker, automated tests and GitHub Actions

PROFESSIONAL EXPERIENCE

Freelance Data Analyst | Self-employed

August 2026 - Present

• Offer data preparation, validation, dashboards and workflow automation services using SQL, Python, Power BI and Excel.

Data Analyst Intern | FIPE - Fundação Instituto de Pesquisas Econômicas

June 2024 - December 2025

• Investigated inconsistencies in collective bargaining records, consolidated the dataset, and documented the validation checks. Researchers and managers used the data to analyze trends and prepare reports.

• Automated recurring collection and processing with Python, R, Excel and VBA to reduce manual work.

• Built and maintained Power BI, DAX and Excel dashboards and metrics for analysis and reporting.

• Used SQL, relational databases, REST APIs and spreadsheets to prepare information for researchers and managers.

• Documented processing, automation and results to standardize deliverables and preserve traceability.

SELECTED PERSONAL PROJECTS

Brazil Income Analysis | IBGE/SIDRA

Built a Python and SQL pipeline and a Power BI report to compare earnings across Brazil's 27 federal units over 20 quarters. Validated the report's calculations with 15 DAX checks.

Case study · Interactive dashboard · Source code

DataFlow | Data analytics and quality

Personal platform for data import, validation and transformation with version history, undo, asynchronous processing and tests. Python/FastAPI, React, PostgreSQL, Celery and Redis.

Case study · Interactive demo · Source code

Technical writing: English tutorials on CSV validation, data revisions and SDK evaluation, with reproducible examples.

EDUCATION

B.Sc. in Computer Science | Universidade Paulista (UNIP), São Paulo | Graduated August 2026

SELECTED TRAINING

• SQL Server, Azure SQL Database and Power BI - 97 hours.

• Microsoft Learn - 8 completed Power BI modules: semantic models, DAX, report requirements, workspaces, model management, content distribution, dashboards and report design.

• Fundação Bradesco - Escola Virtual (2025): selected Power BI training in data analysis, introduction to analysis and preparing data.
